VOLUNTARY SUPPORT OF EDUCATION

A4325-2 U 10/85

1983-1984

Prepared by the Council for Financial Aid to Education and jointly sponsored by the Council for Advancement and Support of Education and the National Association of Independent Schools.

Highlights

Higher Education

- Total voluntary support rose $440 million in 1983-84 to an estimated $5.6 billion, up 8.5 percent from 1982-83
- Corporate support rose 14.3 percent and provided a record 22.7 percent of all gifts. Gifts from nonalumni/ae individuals edged past those from alumni/ae for the first time since 1977-78.

Reports from Participating Institutions show that

- Gifts of property totaled $279.5 million, including $116.9 million in company products
- Corporate matching-gift grants totaled $78.8 million
- Alumni/ae gifts to the annual fund rose 5.4 percent; the average gift was a record $113.40 and a record 20.4 percent of alumni/ae responded to annual-fund drives

Independent Secondary and Elementary Schools

Reports from the Independent Schools indicate that

- The 451 participants received $280 million in 1983-84 versus $276 million reported in 1982-83 by 480 schools
- Gifts from individuals accounted for 75.5 percent of all gifts
- A record 28.8 percent of alumni/ae gave a record average gift of $129.21 to the annual fund, a 6.8 percent increase over 1982-83

August 1985

Preface

This twenty-fifth *Survey of Voluntary Support of Education* has been jointly sponsored by the Council for Financial Aid to Education, the Council for Advancement and Support of Education and the National Association of Independent Schools, with the cooperation of several other national organizations. It is the latest in a series of studies of educational philanthropy dating from 1954-55.

The survey was completely restructured in 1983-84 to reflect the more precise and detailed definitions of sources and purposes for reporting gift income as defined in *Management Reporting Standards for Educational Institutions: Fund Raising and Related Activities*, published in January 1983 by the Council for Advancement and Support of Education and the National Association of College and University Business Officers. While the primary definitions are essentially the same as those used in prior years, the more detailed breakdown of categories resulted in this survey collecting about twice as much data as earlier ones.

Voluntary support excludes income from endowment and other invested funds as well as all support received from federal, state and local governments and their agencies; in editing the survey questionnaires, CFAE deleted all income from these sources when so identified by a reporting institution. Any enrollment figures not supplied by the colleges and universities were taken from the *hep 1984 Higher Education Directory*.

Most of the data supplied by the participating institutions since 1965-66 have been stored on magnetic tape. They are therefore available for supplementary studies of educational philanthropy.

A number of institutions that had participated in the past were unable to revise their gift accounting and reporting procedures in sufficient time to reply to this year's restructured survey. A number of other institutions were not able to supply all of the data requested, but provided as much as they could. We are grateful to all of these institutions for their efforts and expressions of cooperation.

Survey Participation, 1983-84

	Four-Year Colleges and Universities	Two-Year Colleges	Independent Precollege Schools	Total
Invited to participate	1,820	1,006	910	3,736

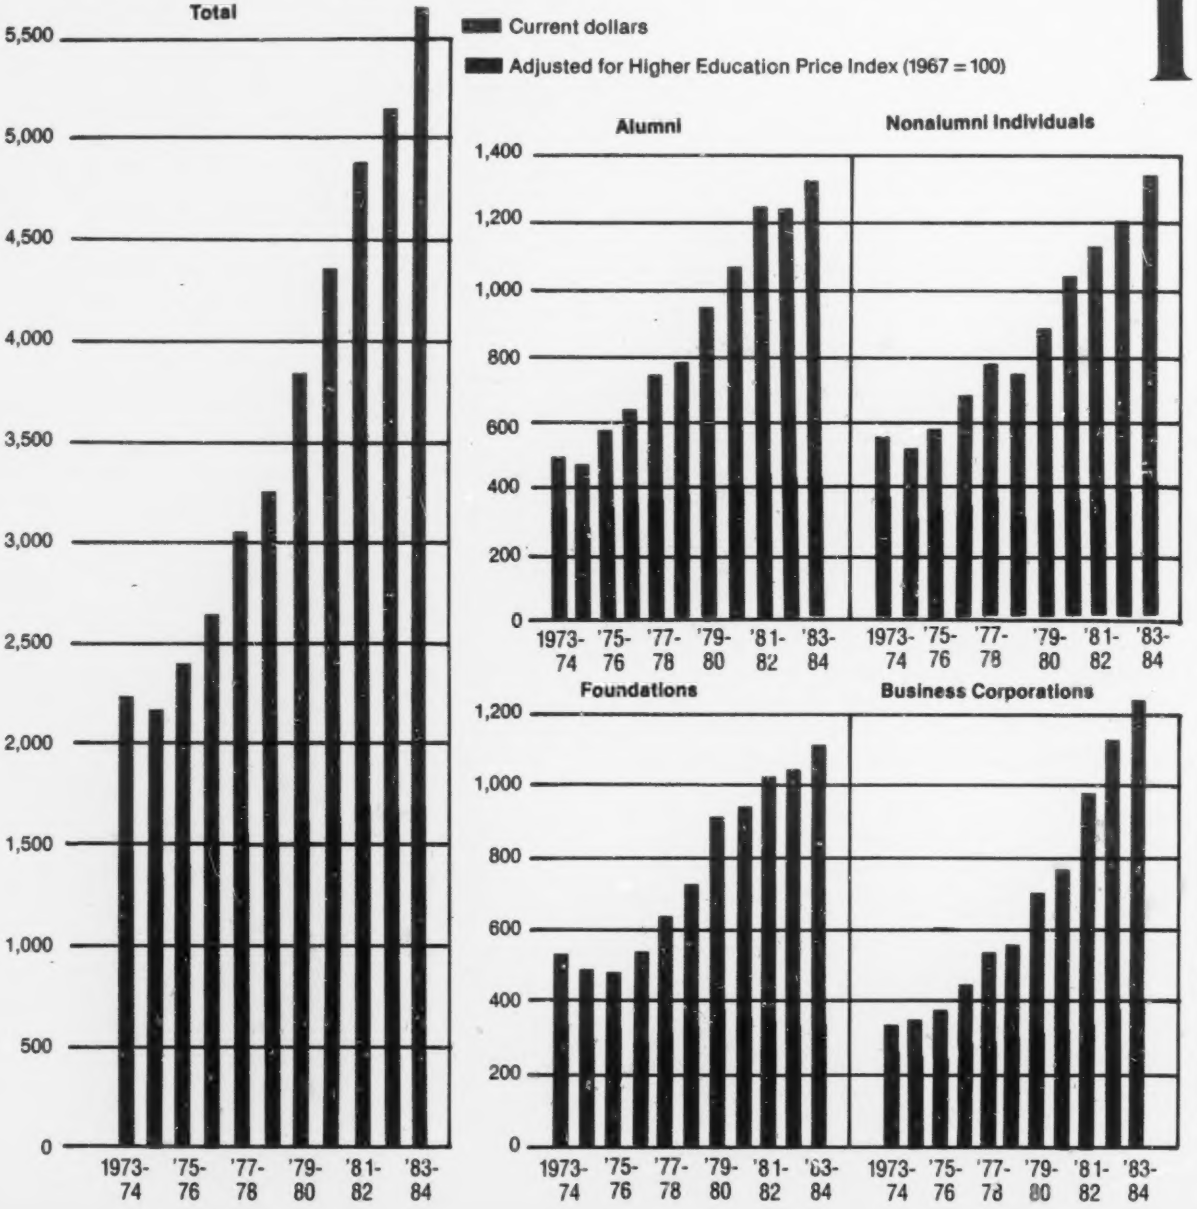
To all those who filled out the questionnaires, to the institutions they represent, and to the cooperating associations in the educational community, CASE, CFAE and NAIS express their gratitude.

Chart 1. Estimated Voluntary Support of Colleges and Universities by Major Sources and in Total (millions of dollars)



I

National Estimates

- Total contributions to higher education increased by $440 million in 1983-84 to an estimated $5.6 billion. The 8.5 percent increase bettered the 6.2 percent rise in 1982-83 and was the ninth successive annual rise in voluntary support
- Corporate gifts rose 14.3 percent, a greater increase than from any other donor group
- Gifts from nonalumni/ae individuals edged past those from alumni/ae for the first time since 1977-78
- Gifts for current operations rose faster than those for capital purposes, growing by 9.0 percent

Voluntary support of colleges and universities increased in 1983-84 for the ninth year in a row. At $5.6 billion in 1983-84, voluntary support has more than doubled since 1974-75, the last year in which gifts declined.

The 8.5 percent rise in voluntary support was more than double the inflation rate of 3.7 percent as measured by the Consumer Price Index (CPI) and was greater than the 5.4 percent rise in the cost of goods and services purchased by higher education institutions, as measured by the Higher Education Price Index (HEPI). (See *Chart 1* and *Table 1*).

By Source

Gifts from nonalumni/ae individuals, which topped those from alumni/ae for the first time since 1977-78, accounted for 23.5 percent of total voluntary support. Corporate support continued its meteoric rise, registering a 14.3 percent gain over the 1982-83 total and providing 22.7 percent of all gifts. This is the fifth consecutive year that corporations have increased their support of colleges and universities by double-digit percentages. Foundation gifts comprised a slightly smaller share of total voluntary support, having dropped from 23.9 percent of all gifts ten years ago to 19.3 percent in 1983-84.

Some of the rise in corporate gifts resulted from a surge in gifts of products manufactured by the corporations. These gifts were encouraged by the Economic Recovery Tax Act of 1981 (ERTA), which provided enhanced tax deductions for products donated to colleges for use in research and training in research. In the 1983-84 survey 1,118 colleges reported receiving gifts of company products valued at $117 million, almost twice the $59 million reported in 1982-83. Corporations also gave almost $43 million in other kinds of physical property, such as used equipment, vehicles, land and other surplus items.

Gifts from alumni/ae resumed their upward climb with a 5.4 percent increase after a small decline in 1982-83.

Religious organizations registered a 7.8 percent decrease in support in 1983-84. The drop in the importance of gifts from religious organizations is consistent with a trend seen in the last 25 years. Religious groups provided 10.3 percent of all private gifts in 1958-59; they provided 3.4 percent in 1983-84. Many of the private colleges that were once either church related or church controlled have since become independent and thus rely less on support from their religious affiliation than in the recent past.

The one-year changes in giving between 1982-83 and 1983-84 are consistent with patterns seen in the last five survey years. Corporate gifts have more than doubled; gifts from nonalumni/ae individuals have grown at a faster rate than gifts from both alumni/ae and foundations. Support from religious organizations has grown only slightly. Gifts from all donor groups except religious organizations have outpaced the rises in both the CPI and the HEPI.

By Purpose

The questions on the survey about donor purposes were changed considerably in 1983-84, so that the data collected were not comparable with those collected in previous years. The only estimates about donor purposes possible in 1983-84 are for gifts for current operations and for capital purposes. As more data are accumulated in future surveys, detailed estimates about changes in the purposes for which gifts are made will again be possible.

Just over three fifths of voluntary support was designated for current operations in 1983-84. Prior to 1969-70 less than half of all private gifts were channeled into current operations. In the first half of the 1970s, slightly more than half of the gift dollars went to current operations; since then more than 60 percent of the funds raised have been designated for current operations. Increased fund raising by publicly supported institutions is responsible for some of this reversal. More than two thirds of the funds public institutions raise are for current operations rather than for capital purposes.

Institutional Expenditures and Voluntary Support

Voluntary support is only one factor in the economic situation of colleges and universities. College administrators must be concerned with the impact of enrollment changes and inflation on total expenditures. *Table 2* examines these factors and presents some good news.

The long projected enrollment declines have not yet occurred, so that the student population has remained fairly constant for the last ten years. Inflation, as measured by both the CPI and the HEPI, has slowed since 1980-81, thus lessening the pressures of the previous

Table 2. Voluntary Support in Relation to Enrollment, Inflation and Institutional Expenditures

decade on college budgets. Institutional expenditures continued to grow in the 1980s, but were not driven as much by inflation in that period as in the 1960s and 1970s. Colleges turned their attention to several areas that had been neglected during the years of high inflation: faculty salaries, libraries, laboratories and instructional facilities, plant maintenance and repair. As a result expenditures per student, which can serve as one measure of educational quality, increased between 1980-81 and 1983-84 both in current dollars and as adjusted for inflation. These improvements often were funded by tuition increases.

Voluntary support grew at faster rates than institutional expenditures between 1975-76 and 1983-84 and therefore provided an increasing share of college budgets. Still, gifts have not assumed the same degree of importance in college and university budgets as in the 1950s and 1960s.

The future will continue to present difficulties for institutional budgets. Uncertainties about the availability of loan funds, together with the threat of higher interest costs, may make some potential students put off going to college at the present time. Critics are now questioning the effectiveness of much of higher education, putting additional pressures on college administrators and faculties to improve the quality of the instruction offered and thus indirectly suggesting even higher tuition rises.

That contributions have continued to increase and now outpace inflation is evidence that higher education has been able to plead its case well in the past. With continuing efforts at self-improvement where necessary, it should be able to continue to do so in the future.

II Survey Results

- The 1,118 respondents reported gifts of $4.68 billion in 1983-84, an average of $4.184 million per institution
- The 928 institutions in both the 1982-83 and the 1983-84 surveys reported an increase in total support of 9.4 percent. Gifts to doctoral institutions grew by 12.3 percent, to all public institutions by 10.3 percent and to all private institutions by 9.0 percent. Corporate support rose 13.8 percent
- Gifts of property totaled $279.5 million, including $116.87 million in company products, $42.96 million in corporate gifts of other property and $119.67 million of in-kind items from all other sources
- Corporate support from matching gifts declined by 2.5 percent to a total of $78.8 million, but the average match reached a record $238.82
- Alumni/ae gifts to the annual fund grew by 5.4 percent; the average gift was a record $113.40, and a record 20.4 percent of all alumni/ae solicited gave
- Almost three fifths of all contributions were made for current operations
- Three quarters of all gifts carried restrictions about their use

This section of the survey report uses the actual figures reported by the participants to provide two kinds of analysis: 1) details of the support raised during the year by the respondents—from whom, by whom and for what purpose; and 2) changes from year to year and over longer periods of time.

Analyzing results over time presents difficulties not encountered in analyses of a single year's results. Many institutions respond to the questionnaire every year, but some participate only sporadically. Meaningful comparisons between years require identical groups of respondents—a "core" group of institutions that report for each of the years compared. This group is always smaller than the total number of respondents in any single year.

The 1983-84 survey has additional complications. It was restructured to reflect the sources and purposes for reporting gift income as defined in *Management Reporting Standards for Educational Institutions: Fund Raising and Related Activities*, published by the Council for Advancement and Support of Education and the National Association of College and University Business Officers. The questionnaire therefore asked for almost twice as many details about contributions as in the past; a donor group—parents—was added; and the donor purposes were changed drastically to reflect more accurately fund-raising activities and university accounting procedures. These changes made comparison over time even more difficult than in the past, but in the long run will provide more useful data.

In addition, the participating institutions are now grouped according to the National Center for Education Statistics (NCES) classification structure. This system places institutions into homogeneous groupings, enabling more meaningful comparisons than in the past. Also, the data gathered in this survey can now be utilized in connection with other data bases that use the NCES structure.

NCES defines five major categories of institutions:

1. *Doctorate-granting institutions*: Universities that are very active at the doctoral level, granting a minimum of 30 doctorates in 3 or more doctoral-level

programs, including first-professional-level medical degrees.

2. *Comprehensive institutions*: Colleges and universities that have strong postbaccalaureate programs, but not significant doctoral-level activity, granting a minimum of 30 postbaccalaureate degrees (including master's and some doctorate and first-professional degrees).
3. *General baccalaureate institutions*: Those whose primary emphasis is on general undergraduate, baccalaureate education. They grant baccalaureate degrees in 3 or more baccalaureate programs or in interdisciplinary studies (with over 75 percent of their degrees at the baccalaureate level or above) and fewer than 30 postbaccalaureate degrees.
4. *Professional and specialized institutions*: Those that are baccalaureate and postbaccalaureate institutions with a programmatic emphasis in one area, usually a professional field such as business, engineering, medicine, theology or art.
5. *Two-year institutions*: Schools that confer more than 75 percent of their degrees or awards for 2 years of work and less than 25 percent at the baccalaureate or postbaccalaureate level. (Institutions with a two-year upper-division program do *not* fall in this category, since they offer the baccalaureate.)

The institutions in each of these categories are further divided by their control—that is, private and independent or publicly controlled by local, state or federal governments.

The Recipients

A slightly smaller number of institutions participated in the survey in 1983-84, perhaps because of the increased difficulty in completing the questionnaire. The 1,118 respondents (20 fewer than in 1982-83) reported good news, however, recording an overall increase of $306.6 million over total gifts in 1982-83 (see *Table 3*).

The two groups of doctoral institutions—public and private—each received more than $1 billion in gifts. The $2.8 billion recorded by these 150 doctoral institutions represented 60.7 percent of the total gifts to all respondents. Public institutions participated to a larger degree in the 1983-84 survey than in any previous year. Twenty-eight percent of the responding four-year universities and colleges were public, and they raised 32.4 percent of all the funds. Ten years ago 24 percent of the respondents

*Figures differ slightly from those published in the 1982-83 survey report because of institutional reclassifications. Details do not always add up to totals because of rounding.

**Differs from the number shown in Table 3 because of different classification criteria in the two systems.

were public institutions, and they raised 22 percent of the gifts.

Comparisons of the total amounts reported by all institutions in 1982-83 and 1983-84 can be misleading because of differences in the number and characteristics of the respondents each year. Calculating average support per institution in each class partially corrects for these disparities. The results are shown in *Table 3*.

In contrast to the last several surveys, when support for public institutions surged, it was the private institutions in 1983-84 — notably the doctoral and comprehensive colleges — that reported double-digit increases in average support per institution. The only groups of public institutions reporting such increases in average support in this survey were the general baccalaureate and the specialized institutions, both of which are very small. Generally, average support for the private institutions ranged between two and three times the average for the public institutions. The only exception was the public specialized institutions, many of which are medical and engineering schools, which raised three times the average for the private specialized institutions.

The changes reported by the "core" institutions in general follow the change patterns of the averages for the total group of respondents. Analysis of the two groups that differ the most — the public doctoral and the public specialized — reveal some interesting factors. A 22.1 percent increase in corporate support and a 19.2 percent rise in gifts from nonalumni/ae individuals fueled the 12.3 percent increase in support for the public doctoral institutions. An 8.2 percent decrease in gifts from nonalumni/ae individuals, together with minimal increases in corporate and foundation support, were responsible for the small growth in total support for the "core" public specialized institutions. A doubling of gifts from nonalumni/ae individuals, coupled with a 38.1 percent rise in foundation support and a 30.9 percent growth in corporate grants, produced the large increase in support of the public baccalaureate institutions.

Comparison of the results in *Table 3* with those shown in *Table 3A*, which shows the responding institutions

*Size of average gift and solicitation effectiveness based only on responses containing all data.

classified as in past surveys, illustrates the advantages of the NCES classification. According to the results in *Table 3A*, for example, support for all the four-year public institutions increased by 6.0 percent in 1983-84. *Table 3* reveals, however, that this single percentage masks wide variations in the changes reported by the various groups of public institutions, ranging from a decrease of 10.9 percent to increases of 5.9, 18.6 and 22.4 percent. Similarly, the 12.1 percent decrease registered by all two-year institutions results from a much larger decrease for the private than for the public institutions.

The Donors

As growth in corporate support has outpaced rises in support from other donor groups in the last few years, the average corporate support per institution now more nearly equals the average support from alumni/ae and nonalumni/ae individuals. Each of these three major donor groups provided over 22 percent of all voluntary support in 1983-84, as can be seen in *Table 4*.

Average support per institution from nonalumni/ae individuals surpassed average support from alumni/ae in 1983-84 for the first time since 1977-78. Private institutions received over 70 percent of nonalumni/ae gifts and more than three quarters of alumni/ae donations. Corporations, on the other hand, divided their grants almost equally between public and private institutions, with the private colleges receiving only a slightly larger share in 1983-84. The division of corporate support between private and public institutions has changed substantially in the last 25 years. In 1958-59 77.3 percent of corporate grants were made to private institutions. The allocation has dropped steadily since then, reaching the 52.8 percent share reported in this survey. Foundations, on the other hand, have apportioned their grants consistently over the years, channeling about 70 percent to private institutions.

The wide variation in change patterns between average gifts from religious organizations for all respondents in 1982-83 and 1983-84 and for the "core" group of institutions responding in both years vividly illustrates the problems caused by differences in the experiences and characteristics of survey participants in the two samples.

*One institution reported a single gift of $250,000 along with several other large gifts, as part of a very successful campaign. Excluding these extraordinary data, the average gift would be $20.37 and the year-to-year change −43.9 percent.

Special Forms of Giving

Respondents were asked to provide details about several ways in which gifts were made to them. The *annual fund* has long been a technique for gaining alumni/ae support. *Bequests* and various forms of *deferred gifts*, such as charitable remainder trusts, pooled income funds and gift annuities, are estate planning methods encouraged by colleges and universities. More than 1,000 corporations have established *matching-gift programs* that double, triple or even quadruple the value of their employees' gifts to higher education. Gifts of *company products*, encouraged by the Economic Recovery Tax Act of 1981, and of other *physical property* are now popular sources of special gifts to colleges and universities.

Annual Funds

Table 5 presents data about annual funds since 1973-74. Although the number of institutions responding to the survey has varied over the years, the number of alumni/ae donors to the annual fund, the total value of their gifts and the average gift have grown steadily each year. The 20.4 percent alumni/ae response rate recorded in 1983-84 is an all-time high. The annual fund has garnered about 40 percent of all alumni/ae gifts consistently over the years.

Alumni/ae of various classes of institution respond differently to solicitations for the annual fund, as can be seen in *Table 6*. Historically, private colleges and universities have relied more heavily on annual-fund drives than have public institutions, and four-year institutions conduct these drives more often than do the two-year institutions. The average gift and the response rate of the alumni/ae are therefore generally larger at the private colleges than at the public colleges.

Bequests and Deferred Gifts

Bequests and deferred gifts accounted for 27.3 percent of total support from all individuals in 1983-84. Prior to 1979-80 bequests and deferred gifts averaged about 35 percent of all gifts from individuals. Since then they have averaged about 28 percent. They tend to be somewhat "lumpy," however, because of the unpredictability of very large bequests.

Matching Gifts

Corporate funds matching employee gifts to higher education institutions have been growing in importance to the colleges. In 1966-67, when this survey started collecting matching-gift data, grants from this source were 2.0 percent of all corporate grants. They reached 8.6 percent in 1982-83 and apparently retreated slightly in 1983-84 to 7.4 percent. This figure may not be completely representative, however, since a number of institutions which reported matching gifts of over $3 million in 1982-83 did not furnish matching-gift data in 1983-84. The importance of matching-gift monies varies considerably according to the type of institution (see *Table 7*). As with the annual fund, matched gifts are larger and generally a more important source of funds for the private institutions than for the public institutions. Matched gifts also represent a much larger proportion of corporate grants to the private liberal arts colleges than to other types of institutions.

*This figure may not be completely representative, since a number of institutions, which reported matching gifts of over $3 million in 1982-83, did not furnish matching-gift data in 1983-84.

Company Products and Other Property

Data on gifts of company products and other property were sought for the first time in the 1982-83 survey, and more details were collected in the 1983-84 survey. The results are presented in *Table 8*. Gifts-in-kind from all sources amounted to almost $280 million, or 6.0 percent of total voluntary support in 1983-84. They consisted of $116.87 million of company products, $42.96 million of other property from corporations and $119.67 million of in-kind items from all other sources. These totals do not represent the full value of all these gifts, however, since some institutions book in-kind gifts at a nominal value of $1 each.

Reported gifts of company products almost doubled in 1983-84, perhaps in part because of better institutional record keeping and reporting procedures. Timing could also account for some of the increase. A grant commitment may be made in one academic year, but the property not received and reported until the following academic year. Reports about these gifts can therefore vary widely from year to year.

Gifts of company products, together with gifts of other property from corporations, made up 15.1 percent of all corporate support. The average size and importance of such gifts to the colleges again varied according to the type of institution. More than three quarters of all company product gifts and two fifths of corporate gifts of other property went to doctoral institutions. In several instances larger amounts of property were given to public institutions than to private institutions.

Colleges usually report product gifts at market value. The tax deduction taken by the donor corporation, however, is less. It is either manufacturing cost or half the difference between manufacturing cost and market value, if the donated product is for research or training in research. Consequently, college reports of company product gifts will be higher than corporate reports.

Gifts of property from noncorporate sources amounted to 3.2 percent of gifts from all sources other than corporations. The private comprehensive and general baccalaureate institutions got more property gifts from noncorporate sources than from corporate sources. The private doctoral institutions received more property from corporations than from other sources. The public doctoral and comprehensive institutions together received the lion's share of property gifts to public institutions from other sources — 91 percent. Overall, donor groups other than corporations split their property gifts almost evenly between public and private institutions.

The Purposes

Gifts for current operations accounted for almost three fifths of all voluntary support in 1983-84, and more than two thirds of those gifts were channeled into specific uses, as shown in *Table 9*.

Respondents were asked to provide details about the restricted uses for both current-fund and capital gifts. *Table 10* presents the results for those institutions that could provide the data. The amounts reported represent 93.8 percent of all gifts for current operations and 87.1 percent of all funds given for capital purposes. Both are large enough shares to provide valuable insights into how donors want their gifts used.

Research, particularly for current operations, was the most popular object of restricted gifts, with 25.3 percent. Student aid was next, receiving just over one fifth of the

restricted monies. Other restricted but unspecified purposes received almost a quarter of the restricted gifts.

The ways in which gifts were restricted in both public and private institutions were remarkably similar.

Size of Gifts

Another first in the 1983-84 survey was the collection of data on gifts from individuals for current operations that were under $5,000 or of $5,000 or more. Participants provided these breakdowns for amounts equaling almost three fourths of all gifts from individuals for current operations. The results are presented in *Table 11*.

Gifts of $[illegible]000 or more numbered just 0.4 percent of these gifts, but provided more dollars than did the smaller gifts (twice as much money for the private doctoral institutions). In all other groups except the public doctoral and public two-year institutions, the smaller gifts provided more total funds than the large gifts.

*	Book Value

Technical Notes:

A. In the listing on the following pages, Column 27 does not show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. In some instances the number of institutions listed is greater than the number tabulated, for two reasons: (1) some multicampus institutions are shown in summary as well as in detail; and (2) some of the component professional schools of major institutions are also listed separately.

DOCTORAL INSTITUTIONS—PRIVATE (56)

	TOTAL SUPPORT	SUPPORT FOR CURRENT OPERATIONS		SUPPORT FOR CAPITAL PURPOSES				SOURCES OF SUPPORT

Independent Secondary and Elementary Schools

Survey Results

- The 451 schools in the survey received $280 million in gifts in 1983-84, an increase over the $276 million reported by 480 schools in 1982-83
- The 1983-84 average per school of $621,107 was a 7.9 percent increase over the 1982-83 average of $575,462
- The year-to-year increase of the 371 schools in both the 1982-83 and the 1983-84 surveys was 6.6 percent, which outpaced inflation
- Gifts from individuals accounted for 75.5 percent of all gifts. Over half of corporate support came from matching gifts and gifts of company products or other property
- A record 28.8 percent of alumni/ae responded to annual-fund drives and increased their average gift by 6.8 percent to a record $129.21

A total of 451 schools participated in the 1983-84 survey and reported receiving $280,119,367 in gifts, an increase over the $276,221,734 received by the 480 schools in the 1982-83 survey. The average of $621,107 per school in 1983-84 represented a 7.9 percent increase over the $575,462 average in 1982-83.

The 1983-84 survey was restructured in several ways. A new donor group—parents—was added; more details about the nature of gifts were asked for; and the donor purposes, especially for capital gifts, were revised to reflect more accurately the way funds are raised and school accounts are kept.

For the first time the schools are being grouped with their peers, using the following NAIS classifications:

Day elementary
Day elementary/secondary
Day secondary
Day/boarding—are primarily day schools that enroll some boarding students
Boarding and Boarding/day—enroll boarding students only, in the first case, or enroll some day students in the second

These five classifications are then further broken down according to the sex of the students. This restructuring will help development officers and school administrators to evaluate their activities more effectively and also more easily to compare results with peers and with other school groupings. The first result of this restructuring is the analysis presented in *Table 12*.

The most successful schools in garnering voluntary support were the eight reporting Boarding and Boarding/day schools for girls. These averaged over $2 million each. The 18 boys schools and the 80 coed schools in this category averaged $1 million each. Overall, the 58 boys schools in all five categories averaged over $800,000 each, the 70 girls schools over $660,000 and the 323 coed schools over $578,000 each.

The examination of giving by schools in *Table 13* also benefits from the more precise analysis made possible by the new survey classifications. Parents turn out to be the most important single source of gifts for all three groups of day schools, although by only a small margin over alumni/ae for the Day elementary/secondary and Day secondary schools. Alumni/ae, as expected, led all the rest in giving to the boarding schools.

Table 12. Total Voluntary Support by Type of Independent School, 1983-84

Type of School	Girls	Boys	Coeducational	Total
Day Elementary	$ —	$ 1,404,789 (3)	$ 11,039,925 (60)	$ 12,444,714 (63)

Choate Rosemary Hall (CT)	2,098,086
Emma Willard School (NY)	1,865,713
The Taft School (CT)	1,810,027

Meaningful comparisons between two years are difficult because of the different number and types of schools in each survey. Calculating average amounts received by each school compensates for the numerical differences but masks differences in characteristics. A group of schools participating in two consecutive surveys is necessary for real comparisons. Only these "core" schools, even though a smaller group, can provide concrete data on the nature of the year-to-year changes in voluntary support.

A total of 371 schools served as the "core" group in this survey (see Appendix Table D for complete details of their reports). They recorded an increase of 6.6 percent in total support in 1983-84 over 1982-83. This increase, greater than the 3.7 percent inflation rate as measured by the CPI, was good news for the schools. Gifts from alumni/ae rose 12.6 percent and from other individuals 8.3 percent. Foundations and corporations, on the other hand, both decreased their support—by 2.4 percent and 5.8 percent, respectively. Contributions for current operations grew by 14.2 percent, while those for capital purposes remained almost the same. Support for boys schools surged by 18.9 percent; the coeducational and girls schools each reported much smaller increases.

Alumni/ae gifts to the *annual fund* have always been important to independent schools. In 1983-84 they totaled $36,679,678 and accounted for 36.0 percent of all alumni/ae contributions. More alumni/ae—28.8 percent—responded to the annual-fund drives in 1983-84 than in any previous year, and they increased their average gift by 6.8 percent to a record $129.21. Individuals often use *bequests* and *deferred gifts*, such as trusts, pooled income funds and gift annuities, as part of their estate plans to support independent schools. These gifts increased in 1983-84, so that they provided 8.9 percent of all contributions from individuals and 6.8 percent of total contributions to the schools. Corporations contributed to the independent schools through *matching-gift programs* and by making grants of *company products* and other *physical property*, as well as through cash gifts. Corporate funds from matched gifts declined slightly in 1983-84 to $4,227,369, but gifts of both company products ($1,451,120) and other property ($566,463) increased sharply. In 1983-84 matching gifts and property donations accounted for 53.6 percent of all corporate support of independent schools. The share in 1982-83 was 44.3 percent. An additional $3,360,715 in gifts of property from sources other than corporations flowed to the schools.

Because of the differences in the categories for reporting donor purposes in the 1983-84 survey, exact comparisons with previous years are not feasible. *Table 14*, however, presents data about voluntary support for current operations and capital purposes, by source of support.

Historically, alumni/ae and other individuals have provided about 70 percent of the private support of the independent schools. Foundations have been other large benefactors, donating about 18 percent of all support. The

The Ten Day or Day/Boarding Schools Reporting the Highest Totals of:

Alumni/ae Contributions to the Annual Fund

Regis High School (NY)	$481,898
Milton Academy (MA)	426,861
University School (OH)	368,805
Punahou School (HI)	366,339
The Baylor School (TN)	322,964
The Kinkaid School (TX)	290,545
The Loomis Chaffee School (CT)	281,513
The McCallie School (TN)	279,267

Dana Hall School (MA)	1,364,759
Montgomery Bell Academy (TN)	1,296,984
University School (OH)	1,282,132

pattern in 1983-84 showed a slight variation. More than three quarters of all support came from individuals, with alumni/ae supplying the largest percentage (36.4), parents the next (24.1), and other individuals giving the rest (15.1). Foundation and corporate gifts declined slightly, so their shares of total support were also smaller (16.2 percent for foundations versus 18.6 percent in 1982-83 and 4.2 percent versus last year's 4.5 percent for corporations).

Traditionally, more than half of the gifts to the independent schools have been made with no restrictions about how they are to be used. Combining the totals for unrestricted current-operations gifts with those for endowment with no restrictions on the use of its income produces an approximate measure of "unrestricted" gifts. They totaled 50.5 percent of all support in 1983-84. Parents and corporations preferred to make gifts without restrictions for current operations, while alumni/ae, other individuals and foundations favored gifts for capital purposes.

Further breakdowns of donor purposes will be possible in the future, as more data are accumulated.
